## ABOUT ME

I'm a 2nd-semester B.E. student in Computer Science and Engineering at Presidency University. Passionate about programming fundamentals, especially Python, and web development using HTML and CSS. I am eager to learn new concepts like data structures and algorithms and to grow my problem-solving skills through coursework and personal projects. I aim to continuously learn and contribute effectively in a professional environment.

## EDUCATION

2024 - 2025	<b>Bachelor of Engineering Computer Science and Engineering</b>
Presidency University	CGPA- 8.54 <sup>st</sup>
2024	<b>Pre-university</b>
M.E.S Kishora Kendra PU College	Percentage - 89.16%
2022	<b>SSLC</b>
Assumption English High School	Percentage- 88.5%

## EXPERIENCE

- Leadership
- Class Representative | [Presidency University] | 2024-Present
- GSSoc 2025 Mentor**
  - Developed an IOT based Smart Urban Streetlightusing aurdino**
  - Member in GDG**
- Practical experience in AI & web technologies

## PROJECTS

- Smart Urban Streetlight | IoT + Embedded Systems**
- Presidency University | Department of CSE
- Developed an IoT-based streetlight automation system using Arduino Mega, LDR, PIR, and vibration sensors for intelligent lighting and accident detection.
  - Integrated Blynk IoT for real-time monitoring and SMS-based alert notifications.
  - Recognized among the Top 120 Innovative Projects at Presidency University.
  - Tech Stack: Arduino IDE, ESP-32, Blynk IoT, LDR, PIR, Vibration Sensors
- JalaRaksha - Rural Water Access UI | Figma**
- Designed a mobile - first interface to help villagers receive water supply alerts, request tankers, and file complaints optimized for low- literacy users with clean visual design

## TECHNICAL SKILLS

---

- Have strong fundamentals in Python and also familiarity with language like Java
- During my innovative project using Arduino, I gained hands-on experience in IoT and embedded systems through the Smart Streetlight project

## EXTRA CURRICULAR

---

- Designed “JalaRaksha”, a Figma-based UI project addressing rural water issues through intuitive mobile design
- GSSoc 2025 Mentor
